

Upstream Gas Development Project

Asiko Hydrocarbon Limited

Outline

- Executive Summary
- The Investment Opportunity
- Project Ralph
- Project Edgar
- Pro Forma Financials
- Next Steps

Executive Summary

- **Asiko Hydrocarbon Limited** ("**AHCL**" or the "**Company**") is a subsidiary of **Asiko Energy Holdings Limited** ("**AEHL**"). The Company was established to harness gas supply as part of the group's clean energy strategy.
- In 2025, AHCL entered into an incorporated joint venture partnerships with **Beluga Energy Limited** ("**BEL**") hereinafter (the "**Beluga JV**") for the development of a gas flare site in the Niger Delta region.
    - The Beluga JV was incorporated as **Beluga Asiko Energy** ("**BAE**"); 50% owned by AHCL and 50% owned by BEL that has been awarded the right to access and offtake gas from the "Edgar" field as apart of the NUPRC's desire to minimize flared gas and increase gas supply in the country. Under the terms of the award, BAE will have the right to **access**, **capture** as well **commercially dispose** of the flare gas from the Edgar. The company will also have the rights to develop the site for additional volumes of gas ("**Project Edgar**").
- The Company has entered into another partnership with another upstream operator EOP Energy Resources Limited for the development of associated gas (AG) from is oil field ("**Project Ralph**").
- In order to facilitate early commencement of both Projects Edgar and Ralph, AHCL has identified two existing businesses in the gas processing and gas transport sectors with cash flow whose assets will allow the project to start development within 3 months.
- Once started, both projects will produce a combined **estimated 10mmscfd of AG** in their first twelve months of operation. The target companies will also rec
- AHCL is looking to raise up to **US$60m in a phased approached with the first phase of up to US$20m** in acquisition and project finance to meet its obligations to develop both projects and achieve first gas within the next twelve months.
- This presentation has been prepared for potential lenders to consider the Projects and the investment opportunity.

The Investment Opportunity – Edgar & Ralph Fields

Development and optimization of a 10mmscfd capacity gas flare site

The Projects

Edgar: Up to 2.2mmscfd

Ralph: An associated gas stream being developed in phases, as a consequence of oil field development:

- **Phase 1**: 3.5 MMSCFD
- **Phase 2:** 4.5 MMSCFD additional
- **Phase 3:** 20.0 MMSCFD additional (future)

Investment Amount

Up to US$60m in a mixture of debt and equity finance:

Use of Proceeds

- Acquisition of an **existing gas business** with **operating cash flow that owns key assets** that will allow AHCL **commence Projects Edgar & Ralph** within **3 months**
- Acquisition of an **existing gas transport and logistics** business with trucking assets (heads and backs) that will support the commencement and development of Projects Edgar and Ralph
- Development finance for Phase 1 of the Edgar & Ralph projects

Project Phase:	Phase 1	Phase 2	Phase 3	Total
Acquisition Finance	US$4m			**US$4m**
Edgar:	US$6m			**US$6m**
Ralph:	US$10m	US$3.5m	US$36.5m	**US$50m**
Total Project Cost	**US$20m**	US$3.5m	US$34.5m	**US$60m**

Debt/Equity Split

70:30 (TBC)

Project Economics

Project Edgar:

- **EBITDA**: US$42.1m
- **EV**: US$10.9m
- **Payback Period**: 4yrs

Project Ralph:

- **EBITDA**: US$109.4m
- **EV**: US$23.4m
- **Payback Period**: 3yrs

Acquisition Target Profiles

Experienced Gas Company

- Over a decade of gas processing experience
- Owns and operates gas processing site with estimated annual production of 2.4mmscfd (**68,000scm/day**)
- **Additional unutilised capacity of 144,000scm/day to be deployed to Edgar & Ralph**
- Existing virtual pipeline capacity of **138,500scm** across **10 trucks, 20 skids** to support mother station capacity
- Long term valid and stable GSPA
- Long term stable offtake contracts with key customers
- No leverage

Metric (Naira)	2026E	2025	2024	2023
Revenue	8bn	9.69bn	12.46bn	8.2bn
EBITDA	2bn	2.3bn	2.58bn	1.71bn
PBT/LBT	TBC	1.25bn	-115.66m	-544.37m

2026E based on June 2026 extrapolated

Experienced Transport Company

- Owns and operates a fleet of 22 truck heads (mostly diesel)
- Acquisition will mean Asiko needs to replace these with 22 LNG/CNG truck heads (replacing diesel).
- Asiko will also add new truck heads and backs to handle the CNG output of **to Edgar & Ralph**
- Long term stable lease contracts with key customers

Metric (Naira)	2026E	2025	2024	2023
Revenue	1.06bn	1.012bn	1.00bn	593.8m
EBITDA	218m	197.38m	177.55m	134.55m
PBT	152m	196.91m	169.67m	118.8m

2026E based on June 2026 extrapolated

ASIKO®

Acquisition Rationale – Gas Company (TargetCo 1)

Purchase shares of **TargetCo 1** at agreed valuation.

Supply gas at up to 50% lower feed cost with immediate impact to GM and EBITDA.

- Deploy spare engines to Ralph and Edgar.
- Increase volumes traded with impact on GM and EBITDA at AEHL.
- Allows acquirer to scale new sites within 3 months.

- **TargetCo 1** has existing site with installed capacity of 216scm/day.
- Gas feedstock at mother station is expensive at US$5.58/mscf. **AEHL has capacity to supply gas at US$1.50/mscf.**
- Operational capacity significantly low at 2.4mmscfd (**68,000scm/day**) presently representing 30% of installed capacity.
- 2025 Annual revenues of **₦9.6bn (US$7m) with potential to triple to ₦29.07bn (US$21m) as unutilised engines are deployed.**
- Low entry cost into CNG market with immediate uptime on the LNG Contract and the gas captured by AHCL.
- Existing NGV footprint and digital infrastructure will drive Autogas consumption and support implementation of LNG offtake contract.

Acquisition Rationale – Transport & Logistics Company (TargetCo 2)

Purchase shares of **TargetCo 2** at agreed valuation.

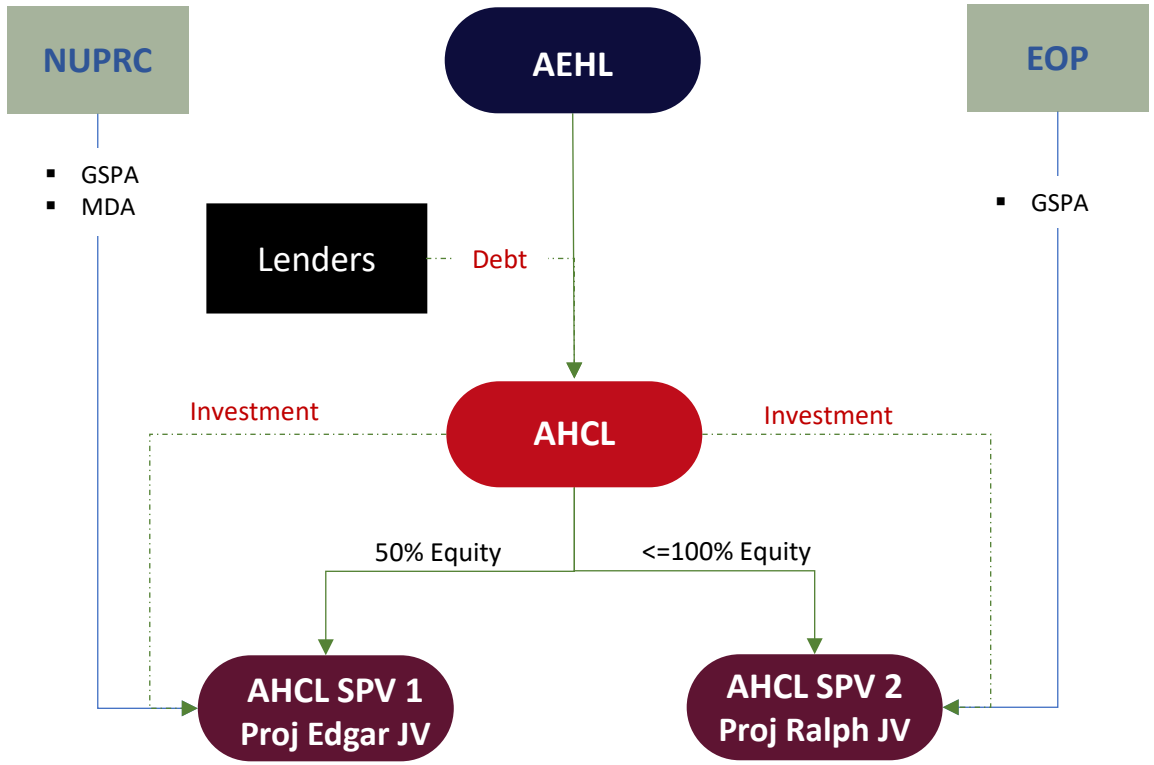

- Convert existing fleet from diesel to LNG/CNG.
- Increased operational efficiency as trucks fuel quicker and travel cheaper on CNG/LNG.
- Immediate impact on Gross Margin and EBITDA.

- Deploy assets to Project Edgar and Ralph sites.
- Dedicated virtual pipeline with lower OPEX and improved margins and profitability.

- **TargetCo 2** has existing fleet of 22 diesel trucks.
- Replacement of diesel engines with LNG/CNG engines will have immediate impact of **reduction in direct cost by as much as 60%**.
- Current Fuels Costs are:
  - Diesel: **US$35.0/mscf**
  - CNG: **US$7.5/mscf**
  - LNG: **US$9.0/mscf**
- 20-25 additional truck heads and backs will be required to both **consume** and **transport** Edgar and Ralph production (much more competitively than currently).
- Increased operational efficiencies with ability to **fuel trucks directly at Edgar and Ralph** gas processing sites leading to reduced queues at CNG stations.

Proposed Funding Structure

- AHCL raises up to US$55m in debt finance in agreed milestones for the development of its upstream supply projects.
- Project SPVs AHCL SPV 1 and AHCL SPV 2 are established to ring fence the project to manage risks and cash flows
- Funds are used to purchase equipment and construct the pipeline for the combined development of the Ralph and Edgar Projects
- Cash flow from the sale of the gases and/or NGLs produced by the JVs will be used to repay the debt.

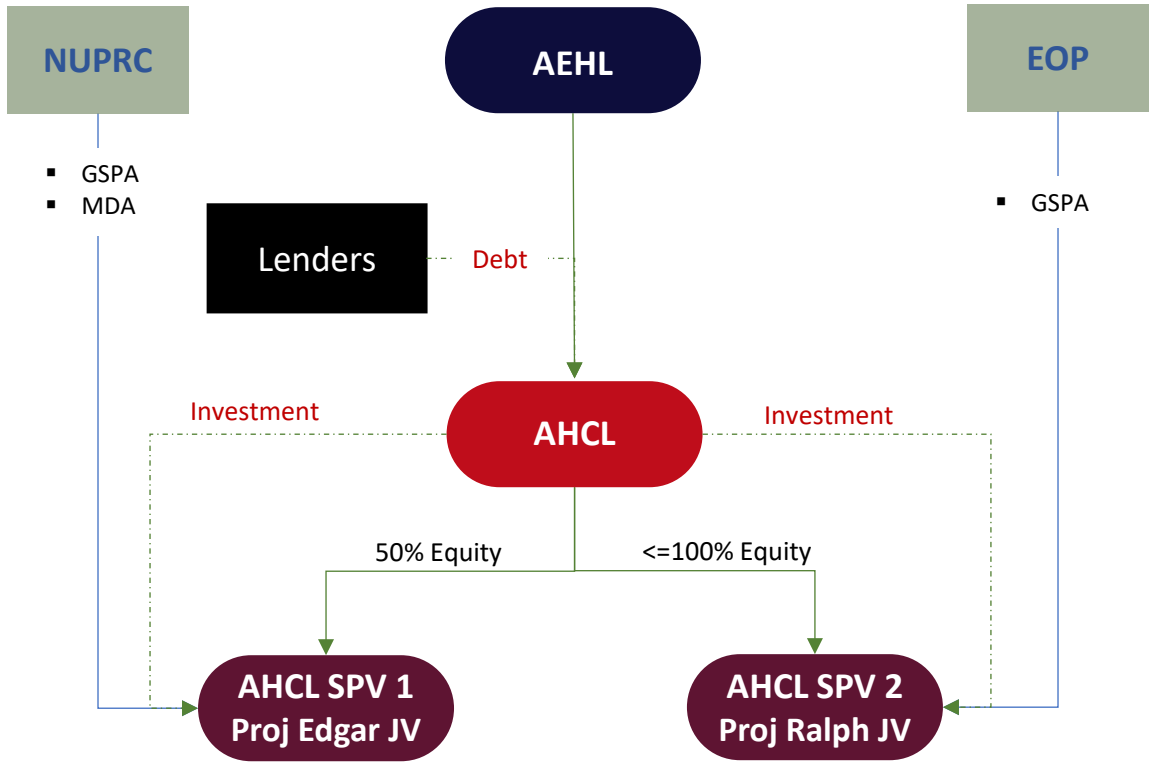

- **GSPA** – Gas Sale & Purchase Agreement
- **MDA** – Milestone Development Agreement

Proposed Operational Structure - Combined

Edgar Field

- Funds are used to purchase equipment and construct the pipeline for the combined development of the Edgar field
- NUPRC has entered into an MDA and a GSPA with Beluga JV giving the right to sell the gas processed at the Edgar field.
- Dry gas produced at BAE is sold at arms length to buyers via CNG trucks.

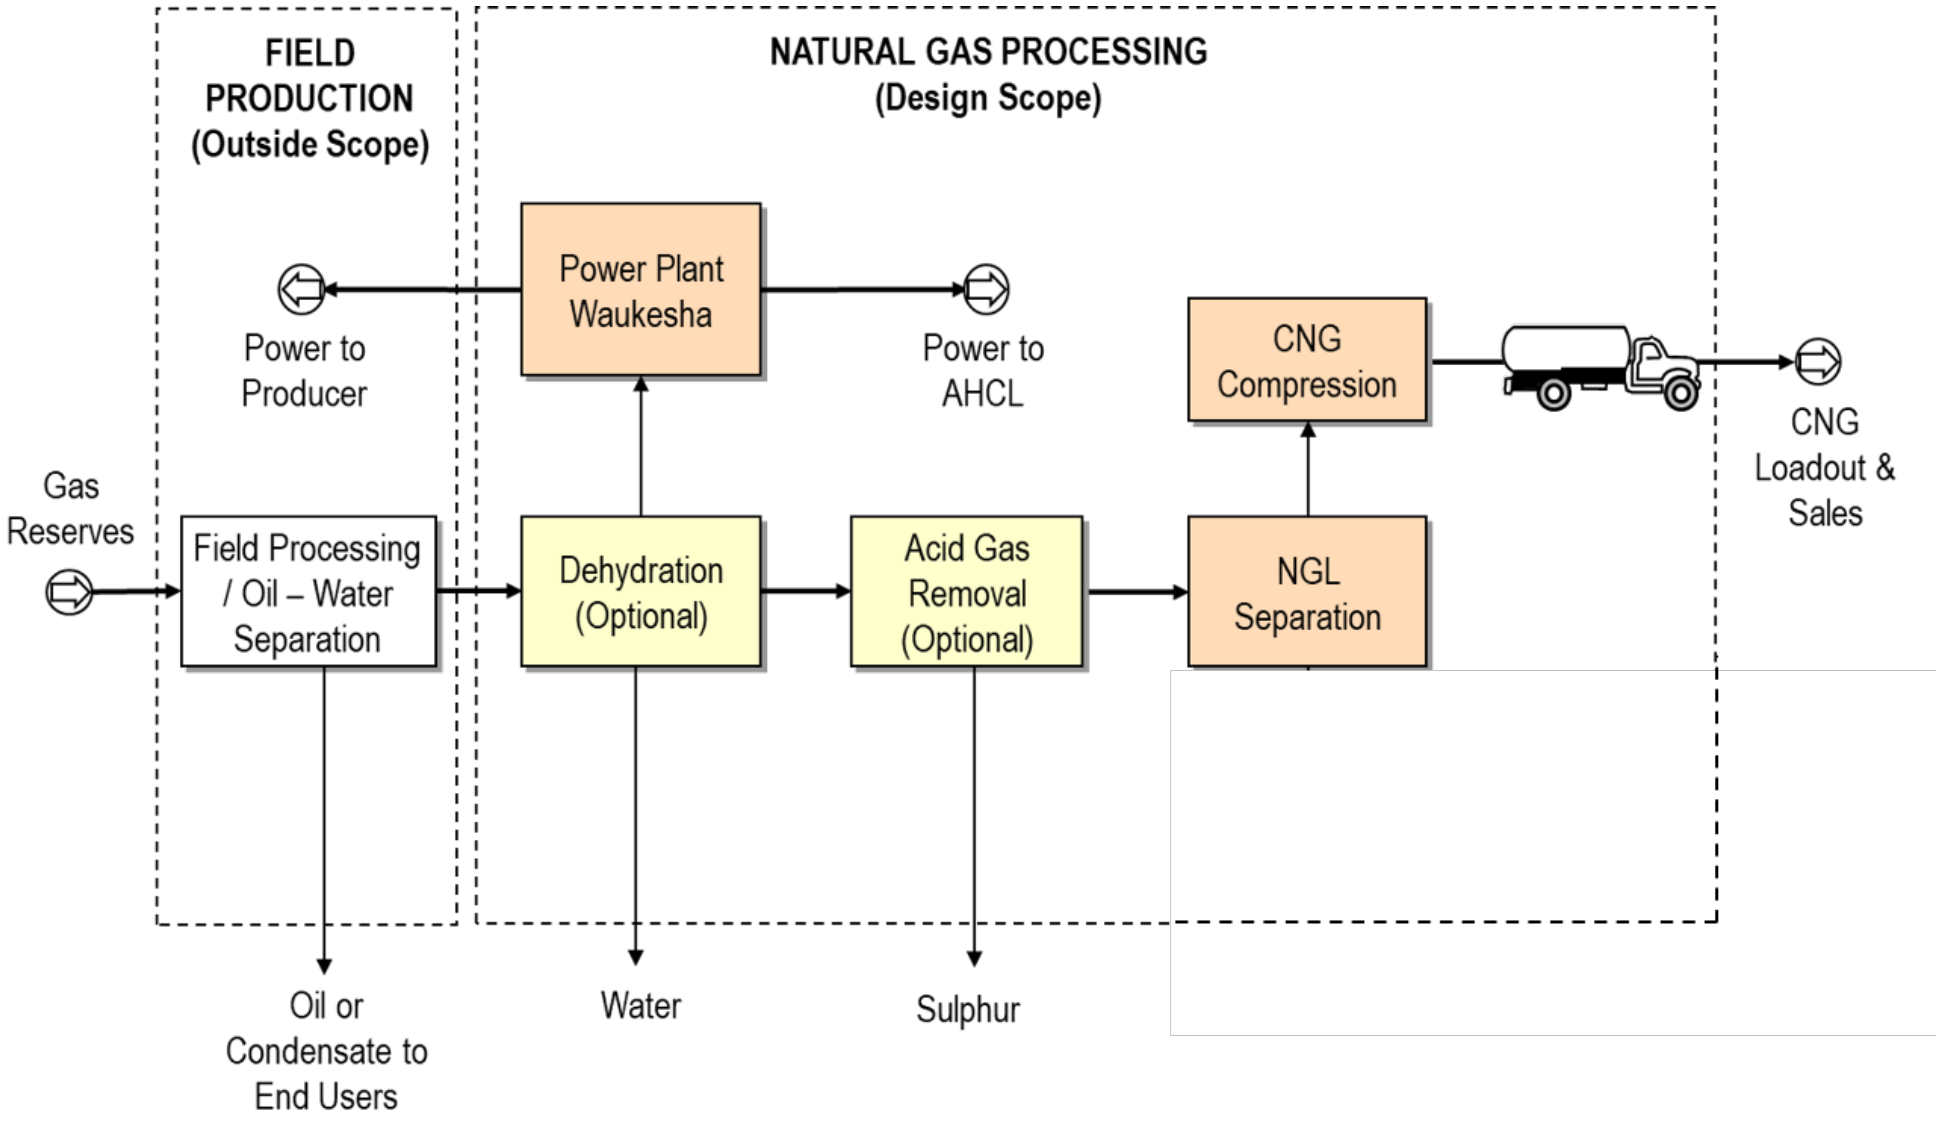

Ralph Field

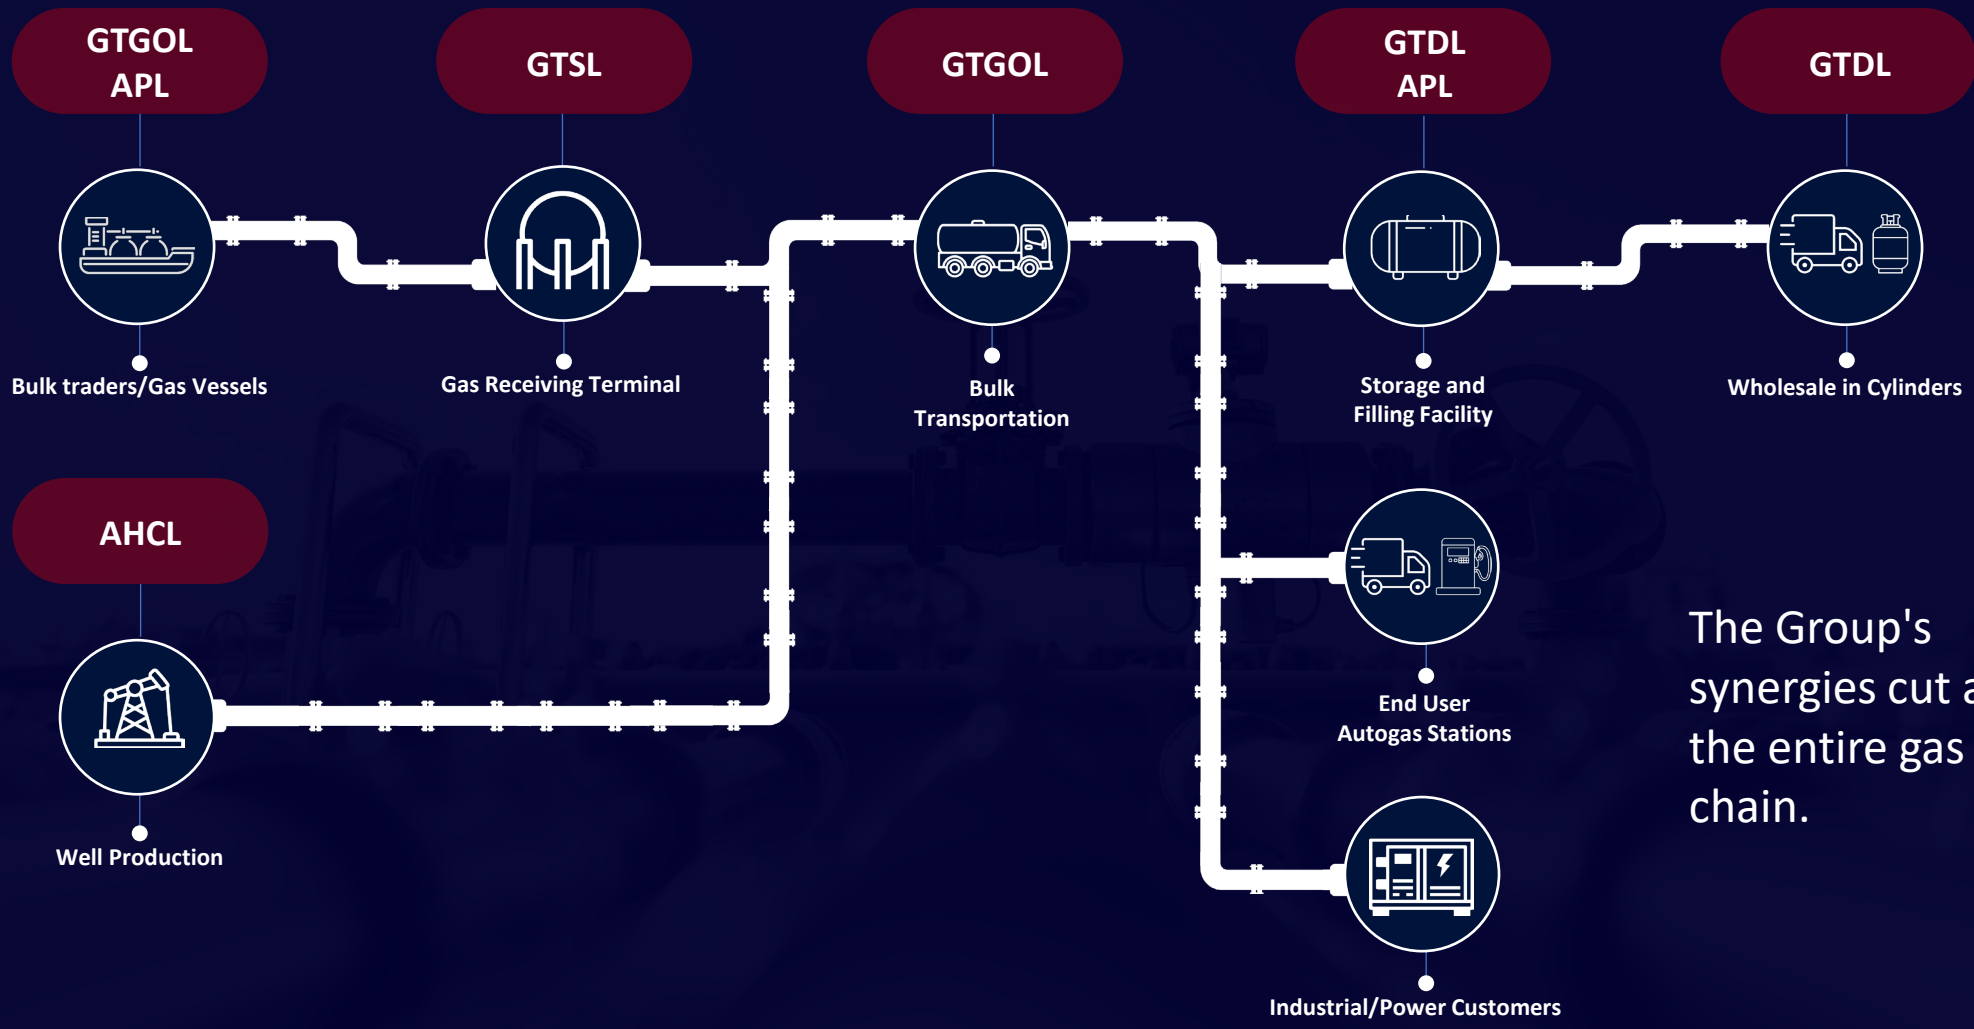

- AHCL purchases the equipment and trucks necessary for the development of the Emuoha project.
- Gas is processed and the dry gas will be compressed into CNG and trucked out for distribution.

- **GSPA** – Gas Sale & Purchase Agreement
- **MDA** – Milestone Development Agreement

Project – Operational Schematic – Ralph Site

Our Expertise

The Group's synergies cut across the entire gas value chain.

Asiko Hydrocarbon Limited (AHCL)

As part of the Group's interest to increase its access to clean energy through gas processing and natural gas liquefaction, AHCL was established.

The company will drive the Group's vision of becoming a leader in the liquefied hydrocarbon gas value chain.

Pro Forma Financials - Edgar

Asiko Energy Group Overview

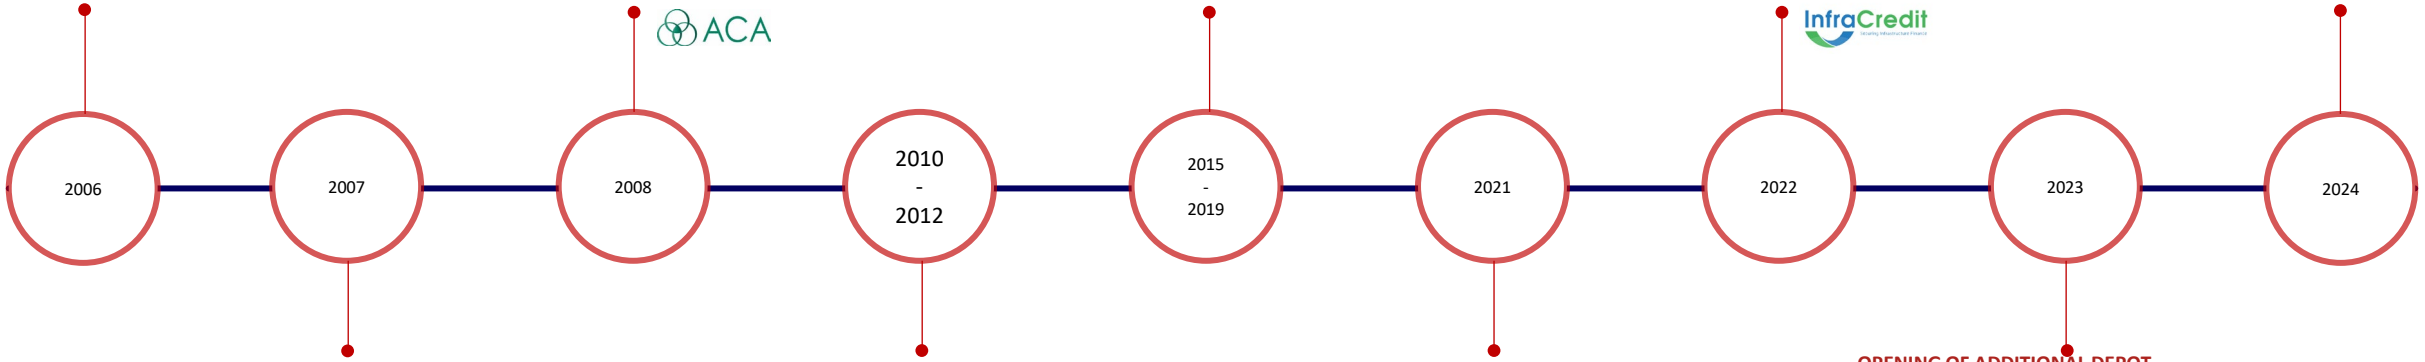

With almost two decades of industry expertise, Asiko Energy has grown into a leading clean energy holding company, driving innovation and sustainability across Nigeria and West Africa.

- Through our six subsidiaries, we are committed to transforming the energy landscape, with a strong focus on LPG, LNG, CNG and renewable energy solutions.
- From virtual pipelines to advanced storage infrastructure, solar solutions, and gas-powered innovations, we are redefining the way energy is delivered and utilised.

Our History

Asiko Energy has evolved over the past 19 years from a company with a single gas retailing station to one of Nigeria's most promising gas energy enterprises. Today, we are the only company in the country with offtake contracts with Nigeria Liquefied Natural Gas Limited (NLNG) for the trio of Butane, Propane and LNG.

FOUNDING
- The Company was founded as Linetrale Gas Limited to establish itself as the leading independent LPG supply and distribution company in Nigeria

MARKET ENTRY
- The Company secured Domestic LPG contract from NLNG and commenced trading LPG

EXPANSION
- The Company acquired land in Ijora to develop its Lagos depot – central distribution hub for Southwest
- African Capital Alliance ("ACA") injected USD3.2 million equity in the Company

INVESTOR CONFIDENCE
- The Company secured additional funding from ACA, bringing ACA's total investment to USD7.5 million

DISTRIBUTION
- The Company rolled out mini gas outlets which delivered LPG (under the Lite Gas® brand) to last mile end users

CONSOLIDATION
- ACA exited its investment in the Group
- The Company won the Domestic LNG contract from NLNG to facilitate domestic gas penetration
- Ground-breaking of fully-mounded LPG and LNG terminal at Ijora

CORPORATE BOND
- The Company issued its 1st private corporate bond guaranteed by InfraCredit for expansion

OPENING OF ADDITIONAL DEPOT
- On 19 September 2023, unveiled a 300MT LPG and CNG depot in Utesi

COMMERCIAL PAPER
- Commercial Paper issuance in July 2024
- NGN50bn Bond Programme established and NGN8.5bn series 1 issued
